## EDUCATION

- National University of Singapore** Singapore
  - Bachelor of Science in Data Science and Analytics* Aug 2023 – Jun 2027 (Expected)
    - Coursework:** Data Structures & Algorithms (Java), Programming Methodology (Python), Essential Data Analytics Tools, Data Visualisation (R), Data Science in Practice (Docker, Git, Flask, SQL)

## SKILLS AND LANGUAGES

- Programming Languages:** Python, R, Java, SQL, JavaScript, HTML, CSS
- ML / AI:** TensorFlow, Scikit-learn, OpenAI API, Prompt Engineering, LLMs
- Backend & APIs:** FastAPI, Flask, Node.js
- Frontend:** React, Vue.js, Next.js, Tailwind CSS
- Databases:** PostgreSQL, MySQL, MongoDB
- Tools & Platforms:** Git, Snowflake, Firebase, AWS, Docker, Power BI, Tableau, Figma, Postman

## EXPERIENCE

- Home Team Science and Technology Agency (HTX)** Singapore
  - Data Engineer Intern* May 2026 – Aug 2026 (Incoming)
    - Assisting in gathering requirements and data pipeline needs to support data scientists and AI engineers across ongoing projects.
    - Translating pipeline requirements into scripts to transform and load data into the data platform, and maintaining Infrastructure-as-Code (IaC) workflows for CI/CD pipelines and data pipelines.
    - Building lightweight monitoring tools for pipeline health and data quality (logging, basic alerting), and collaborating on frontend/backend integration tasks such as connecting deployed AI models to training data.
- CPF Board** Singapore
  - GenAI Product Development Intern* Jan 2026 – May 2026
    - Designed and implemented GenAI-powered solutions to enhance CPF Customer Contact Centre operations, improving response quality, consistency, and operational efficiency through LLM-assisted workflows.
    - Built and optimised retrieval-augmented generation (RAG) pipelines integrated with CPF's internal knowledge bases, applying prompt engineering and evaluation techniques to ensure accurate, policy-aligned responses.
- Crayon Data** Chennai, India
  - Artificial Intelligence Engineer Intern* Dec 2025 – Jan 2026
    - LLM-Driven Data Ingestion Platform:** Built an LLM-powered ingestion pipeline that converts unstructured offer data into structured, production-ready datasets, reducing manual processing effort by over 70%.
    - Data Quality & System Reliability:** Designed validation and regeneration layers enforcing schema consistency and mandatory fields, and implemented deduplication, deterministic ID assignment, and referential integrity to support scalable ingestion into a global merchant repository.
- Superbank** Jakarta, Indonesia
  - Operations (Data Science) Intern* May 2025 – Aug 2025
    - Fraud Analytics:** Developed Snowflake SQL pipelines and Python workflows to detect suspicious activity, reducing potential fraud exposure by 20%.
    - Stakeholder Alignment:** Collaborated with risk analysts and stakeholders to align data solutions with operational needs.

## PROJECTS AND COMPETITIONS

- NUS Datathon 2026 (1st Place Winner)** Feb 2026
  - Team Lead (Explainable Company Intelligence Platform)*
    - Developed an end-to-end company intelligence system using feature engineering and mixed-type clustering (K-Prototypes) to segment 8,500+ companies, validating cluster quality with silhouette score, PCA visualization, and statistical profiling.
    - Engineered 20+ operational and IT-related features (e.g. revenue per employee, IT intensity, device density) and built peer-based benchmarking to contextualize performance without misleading industry averages.

- Built an AI Analyst using Llama 3.3 70B (Groq) with retrieval-augmented prompting and strict guardrails to deliver data-grounded, non-hallucinatory explanations, presented via a full-stack React + FastAPI dashboard.

## • NUS Hackathon 2025 (Top 3 Finalists)

Nov 2025

### • Machine Learning Lead (Medical Insurance Cost Prediction)

- Developed an interpretable ML pipeline with engineered features and interaction terms to model non-linear health-risk effects in insurance charges.
- Compared Ridge, Lasso, Elastic Net, Random Forest, and XGBoost using cross-validation with AIC and SHAP to identify smoking status and BMI as dominant cost drivers.
- Conducted Equalized Odds fairness analysis and achieved  $R^2$  above 0.85, presenting results to an expert panel and placing Top 3 out of 40 teams.

## • NUS Datathon 2025 (Top 5 Finalists)

Feb 2025

### • Team Lead (Advisor-Client Matching Solution)

- Developed a hybrid recommendation system using SVD-based Collaborative Filtering and Content-Based Filtering to optimise advisor-client matching based on profiles, expertise, and historical policy outcomes.
- Engineered custom features (compatibility score, policy success rate) and achieved **98.6% Precision@5** and **100% Recall@5**.
- Collaborated with a team of five to deliver a fully data-driven solution under tight timelines, securing Top 5 Finalist placement out of 75 teams.

## • Hybrid CNN + RAG Dermatology Decision Support System

Sep 2025 – Nov 2025

### • Academic Project (Deep Learning and Retrieval-Augmented Generation)

- Developed a two-stage diagnostic system using CNNs (ResNet-50, EfficientNetV2M) for skin-condition classification and a RAG layer for personalised condition explanations and treatment guidance.
- Improved model performance by addressing class imbalance with weighted regularisation, evaluating chunking/search techniques (Recursive vs Agentic, Semantic vs Hybrid), and integrating biomedical-specific embeddings (PubMedBERT, EmbeddingGemma).
- Achieved significant accuracy gains (~70% improvement with EfficientNetV2M) and optimised RAG quality using RAGAS metrics, identifying Recursive Chunking + Hybrid Search as the best balance for faithfulness and answer relevancy.

## ACTIVITIES

---

### • Alumni Relations Committee @ NUS Students' Science Club

Singapore

#### • Head of Publicity

Oct 2025 – Present

- **Brand Strategy & Communications:** Led ARC branding and messaging strategy; owned Instagram and LinkedIn content calendars, copywriting, and all public-facing communications.
- **Leadership & Brand Governance:** Managed and mentored three Publicity Executives; delivered reusable Canva/Figma templates, event packs, and signage, and established an ARC Branding Kit defining colours, typography, accessibility, and content standards.

### • Developer Group @ NUS Computing

Singapore

#### • Head of Branding & Marketing

Jul 2025 – Present

- **Leadership:** Led branding strategy and managed website UI/UX while coordinating marketing campaigns for developer events.
- **Engagement:** Designed high-quality materials to improve outreach and participation.

### • NUS Product Club

Singapore

#### • Curriculum Executive

Jul 2025 – Present

- **Workshops:** Conduct workshops on A/B testing, UI/UX fundamentals, and product design principles.
- **Curriculum:** Support curriculum planning and mentoring for students exploring product management.

## AWARDS

---

- NUS Datathon 2026 — Top 1 of 86 teams.
- NUS Hackathon 2025 — Top 3 of 40 teams.
- NUS Datathon 2025 — Top 5 of 75 teams.
